FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 203

This search report has not been established in respect of certain claims, because they relate to parts of the application that do not comply with the prescribed requirements to such an extent that no meaningful search can be carried out, specifically:

Reason for the limitation of the search:

The embodiments described in this application use Video-CD, CD-R, CD-RW, and writable DVD such as DVD+RW. The device of claim 1 is capable of recording information on a record carrier, which can be embodied in any of the mentioned systems. In order to record information on any of these media, access is required to the corresponding technical standard. As the standards of all the mentioned systems are available only by signing a Non Disclosure Agreement (NDA), these standards do not form part of the prior art in the sense of the PCT, which is exclusively prior art which may be freely cited. The International Search Authority, even when buying a licence to any of the mentioned systems, would have to sign the NDA, and would thereby not be allowed to cite the obtained information.
